

HEXAGON US FEDERAL

Company Background and Overview

ABOUT HEXAGON US FEDERAL

Hexagon US Federal is an independent subsidiary for Hexagon Corporation’s U.S. federal business. As a premier provider of integrated geospatial and technical solutions to the US Government, Hexagon empowers government agencies to make smarter and faster operational decisions. We help our government customers create intelligent maps, analyze geospatial intelligence, manage assets and infrastructure, and provide dispatch emergency services. Our solutions transform complex data from disparate sources into real time actionable information. With our deep industry expertise and long tradition of technical innovation, we also help our government customers optimize and streamline operations, protect critical assets, and improve operational performance and readiness while reducing costs.

Defense and intelligence agencies have relied on Hexagon for 40 years because we bring together people, data, and systems for faster and more accurate decision making. Our geospatially powered solutions transform vast amounts of complex data into actionable intelligence, protecting U.S. and global interests and supporting the warfighter.

Vision and Mission

Hexagon US Federal aspires to play a leading role in the effort to solve the challenges our world is facing by providing groundbreaking information technologies that make positive and lasting impact.

We are dedicated to delivering actionable information through information technologies that enable U.S. Government customers to shape smart change across diverse business and industry landscapes.

Core Values

We are committed to providing all of the following:

- **Accountability** We hold ourselves accountable and responsible to each other and our customers and stakeholders.
- **Integrity** We do the right thing.
- **Relationships** We cultivate respectful relationships, working as a team to achieve common goals.
- **Excellence** We consistently deliver exceptional value.

Quality Management System

“Every employee is committed to implementing quality processes in order to meet or exceed customer expectations and ensure mutual profitability Customer satisfaction for all internal and external customers is the expectation, and will be achieved through processes that deliver a superior product or service on time and at the right price.”

—Joe Fehrenbach, President and CEO

Quality Management Objectives

- Provide Hexagon products and integrated turnkey solutions to meet client requirements, schedule, and budget
- Maintain a customer satisfaction rate of at least 4 on a 5-point scale
- Continuously improve product quality and process efficiency
- Maintain a fair and creative work environment that respects new ideas and hard work

Industry Certifications

- Member of the Open GIS Consortium
- Certified to the ISO 9001:2008 standard

SOLUTIONS, PRODUCTS, AND SERVICES

Geospatial

As geospatial experts who continue to lead the industry in an evolving world, Hexagon provides accurate and flexible solutions to complex workflow challenges.

Whether you are responsible for a military operation or evaluating the environmental impact of a disaster on federal forestlands, our cost-effective server-based solutions are designed to let you manage and share data with your entire user base and allow you to take advantage of today's "cloud" and mobile technologies, and our tools are easy to use and.

Hexagon geospatial applications integrate well with other systems you may be using. As the holder of the largest collection of open standards certifications in the world, we continue to pioneer open data storage and sharing.

Incorporating our proven ERDAS® and GeoMedia® products among many others, Hexagon provides expert service, solutions, tools, and products.

Lifecycle Solutions

If you are in the need of cradle-to-grave support of weapon systems or other requirements, Hexagon's Lifecycle Solutions Business Unit provides full life cycle management. We provide world class information technology (IT) support predominantly in five functional arenas: (1) aircraft "scheduled" maintenance, (2) configuration management and technical data, (3) installation and energy management, (4) records and declassification management, and (5) systems engineering and integration.

We also deliver cyber security and information assurance solutions to help Government and Department of Defense (DoD) clients design, build, manage, operate and safeguard their assets and infrastructure.

We operate globally and meet customer needs locally. We service our customers whenever and wherever our expertise is needed, which enables us to deliver innovation and value on

a national scale. Our customer base includes support to DoD (U.S. Army, Navy, Air Force, and DLA), U.S. Coast Guard, and State of Alabama customers.

Public Safety, Security, & Emergency Management

Whether your responsibilities lie in protecting our borders, fighting terrorism, or safeguarding military installations and those who live and work on them, Hexagon is your trusted partner.

Our industry-leading solutions provide public safety, military personnel and government agencies with the advanced technology and tools they need to achieve a common operating picture, helping to create a safer world on a local, regional, and national level.

We also support emergency management activities, including prevention and response planning, analysis, monitoring, and recovery for natural disasters and large public events. As an integral component, our Spatial Data Infrastructure application provides you with the technology framework you need for cost-effective and efficient communication involving geospatially related information.

Other Solutions

Hexagon offers services and solutions across the U.S. Department of Defense as well as federal civil agencies. Hexagon solutions lead to impactful, effective, and cost-saving results. We also specialize in the following:

- Intelligent data integration from multiple sources through EdgeFrontier®
- Geospatial map production
- Natural resources
- Public works management
- Fire management
- FOIA request management
- Anti-terrorism and force protection
- Border security
