

VectorCardSM

A Smart, All-in-One Maintainer Solution

VectorCardSM is a Commercial Aviation Best Practice and Intergraph[®]'s solution to provide maintenance personnel with work cards that are clear, concise and all-inclusive. For over a decade, the U.S. Air Force has relied on Intergraph solutions for aircraft maintenance and sustainability, resulting in improved safety and reliability, quicker maintenance cycles, and significant cost savings.

The solution integrates maintenance documents into a comprehensive, mechanic-focused digital task set. All relevant data needed to perform each maintenance task is clearly and concisely displayed in a standardized way to ensure the right maintenance is performed every time.

“To do the APU servicing, I used to have to pull up four separate references. Now I just use the VectorCards with pictures, work steps, and all the parts I need. What a relief; I hope we never go back to the old [task orders].”

- Testimonial from a C-5 Maintainer

Better, Reliable Data Sets

Extensive technical data is necessary to create maintenance data sets. Typically, maintainers must research specific technical order requirements needed to perform the maintenance. They are also responsible for tracking necessary support equipment and parts to initiate and complete the task. The lack of detail and clarity in existing work card steps subjects the mechanic to interpret the instructions. Inefficiencies and errors thrive on a shop floor environment when these challenges arise.

Intergraph's VectorCard solution transforms non-standard and outdated maintenance work cards by delivering a mechanic-centric digital data set combining:

- Logical and concise maintenance work instruction

- Enhanced intuitive graphics
- Parts and tooling requirements
- Safety-related cautions/warnings
- Task progression sign off

Part numbers are listed for all “required” and many “as needed” parts. Special equipment and tool descriptions are also provided, drastically streamlining the maintenance repair process. This solution delivers a logical sequence of work steps with intuitive graphics, cautions, and warnings. Each and every VectorCard provides all practical information the mechanic needs to perform the correct maintenance every time.

Example of a VectorCard

Compliance

Intergraph's VectorCard solution is fully Specification 1000D (S1000D) compliant. S1000D is the international specification for the procurement and production of technical publications and allows reuse of data to eliminate duplication, increase efficiency, and ensure accuracy. Further, the VectorCard solution offers a fully digital solution that supports SGML, XML, PDF, and multiple graphic formats.

VectorCard seamlessly integrates with Intergraph's other FleetVectorSM and FleetInsightSM products.

VectorCardSM Benefits

Clearly define the level and intensity of required inspections
Provides all practical information required to perform the task (man hours, parts, tools, technical reference, etc.)
Delivers a logical sequence of work steps with intuitive graphics, cautions & warnings
Reduces the possibility of maintenance errors
Dramatically increases mechanic touch-time
Streamlines the maintenance process and cuts flow time
Consistent work card format (standard work)
Improves on-the-job safety
Reduces the learning curve, i.e., provides maintenance digital data that all levels of mechanics can clearly understand

ABOUT INTERGRAPH GOVERNMENT SOLUTIONS

Intergraph is the leading global provider of engineering and geospatial software that enables customers to visualize complex data. Businesses and governments in more than 60 countries rely on Intergraph's industry-specific software to organize vast amounts of data and infuse the world with intelligence to make processes and infrastructures better, safer, and smarter. The company's software and services empower customers to build and operate more efficient plants and ships, create intelligent maps, and protect critical infrastructure and millions of people around the world. Intergraph Government Solutions (IGS) is an independent subsidiary for Intergraph SG&I's U.S. federal business. Intergraph is a wholly owned subsidiary of Hexagon AB, (Nordic exchange: HEXA B). For more information, visit www.intergraphgovsolutions.com, www.intergraph.com and www.hexagon.com. Intergraph Government Solutions 7/2013
