

HEXAGON US FEDERAL GEOSPATIAL TECHNOLOGY

Complete, Robust, Cloud-Ready Solutions

ABOUT OUR SOLUTIONS

Hexagon US Federal provides a wide range of commercial-off-the-shelf solutions for handling complex and demanding geospatial requirements including ingest, cataloging, discovery of imagery and other forms of geospatial data, image processing, photogrammetry, GIS, and map production.

Hexagon brings the widest range of hardware and software geospatial solutions to market, tackling complex problems for customers across industries such as defense and intelligence, homeland security, agriculture, transportation, public safety, and utilities. Our solutions help those customers organize and visualize vast amounts of complex geospatial data, ultimately enabling them to make more effective and confident decisions.

Experienced Hexagon personnel, including many cleared individuals, provide a complete range of professional support services for the development, customization, implementation, and training on our solutions across the U.S. federal customer base including the Department of Defense and the intelligence community. For many of these customers, including the National Geospatial-Intelligence Agency (NGA), these services also include integration with enterprise systems.

Key Strengths

1. We offer the broadest set of commercial-off-the-shelf (COTS) geospatial application of any company globally.
2. We deploy dozens of TS/SCI cleared subject matter expert (SME) staff with NGA and national defense and intelligence agency experience worldwide.
3. We house a world-class geospatial production facility.
4. We are part of the largest global geospatial corporation through our parent company, Hexagon.

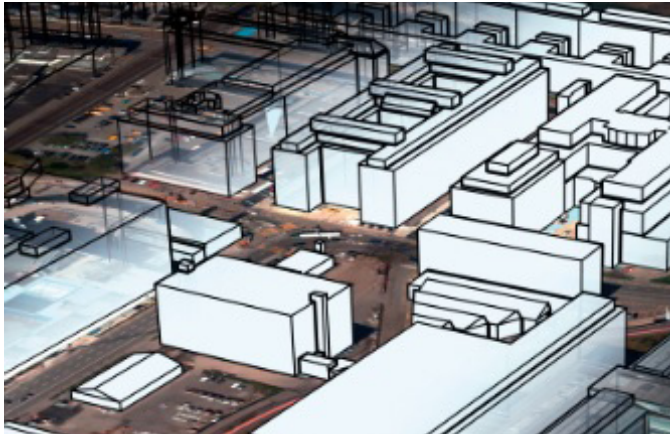

Featured Products

- **Cartographic Web Services (CWS)** Cloud-based automated cartographic map finishing solution
- **Cloud-based Exploitation** Web-based authoring and execution of applications for photogrammetry, image analysis, GIS analysis, All Source analysis, and Structured Observation Management
- **ERDAS APOLLO** Enterprise search and geospatial data management, including ingest, federated search and cataloging, and highly performant dissemination via open standards
- **ERDAS IMAGINE®** Leading image processing and remote sensing software for desktop and cloud-based analysis
- **EdgeFrontier®** Highly configurable middleware for seamless enterprise integration of real-time sensor inputs directly into mission workflows
- **GeoMediaSmart Client** A server-based web client GIS built specifically for collaborative roles-based enterprise geospatial workflows

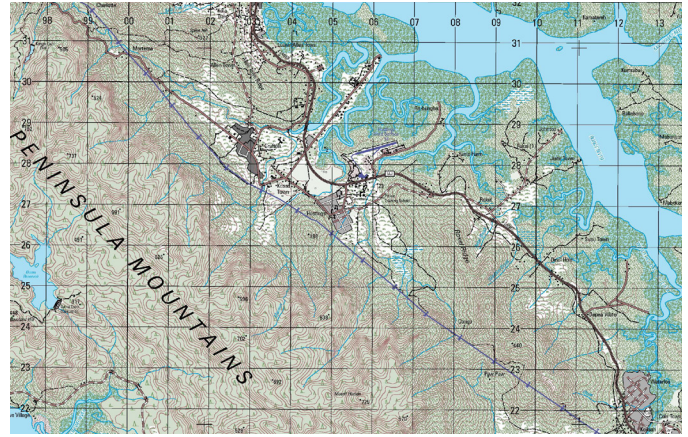

Open Standards

We operate with a strong adherence to open standards and interoperability by implementing the following practices:

- Open Geospatial Consortium (OGC) interoperable across the portfolio
- Support for industry, Department of Defense, and intelligence community file formats
- No proprietary dependencies for data formats
- Many vital capabilities available through WPS and RESTful web services

Hexagon provides a range of geospatial solutions that enable users to visualize complex, dynamic data in vivid and meaningful ways for more effective decision-making.

The Cartographic Web Services solution from Hexagon accelerates map production with automated map-finishing processes.

Partnerships & Certifications

As the geospatial experts who continue to lead the industry in an evolving world, we value our partnerships and customers. That means we work hard to maintain and exceed standards necessary for industry memberships and certifications.

- Founding member of the OGC
- USGIF Strategic Partner
- Oracle Global Alliance Partner
- Certified to the ISO 9001:2008 standard for solutions, products and services
