

INTERGRAPH® INSIGHT REPORTING

Intergraph® InSight Reporting is a platform for quickly building and sharing interactive reports and dashboards. It delivers data models and pre-built reports for Intergraph Computer-Aided Dispatch (I/CAD), and also connects to third-party data sources.

This tool removes the reliance on specialist data management and analysis skills to prepare source data and develop new reports, reducing costs and enabling agencies to respond quicker to their stakeholders' needs. It delivers deeper insight by leveraging multiple data sources without additional licensing fees and restrictions. Additionally, it increases awareness and improves communication through clear reports delivered automatically or on demand.

KEY BENEFITS

REMOVE COMPLEX DATA MANAGEMENT TASKS

By providing a simple-to-use, web-based administration portal that uses industry terminology to manage the database models, Intergraph InSight Reporting insulates users from having to understand the complexities of database management terminology and operation.

PROVIDE INSIGHTS ON COMMON FOCUS AREAS

Intergraph InSight Reporting includes 26 pre-built reports that provide insights on the most common public safety and dispatch focus areas, while saving significant time in report creation.

EASILY CREATE NEW REPORTS & DASHBOARDS

Intergraph InSight Reporting users benefit from the simple, web-based portals included with the Microsoft® Business

Intelligence tools for report and dashboard creation and distribution. Microsoft SQL Server Analysis Services (SSAS), Microsoft SQL Server Reporting Services (SSRS), and Microsoft Power BI each provide easy-to-use interfaces that enable a wider range of users to create dynamic, interactive reports, dashboards, mobile reports, and modern-looking paginated reports.

IMPROVE DEPTH OF ANALYSIS

Intergraph InSight Reporting has the ability to connect to third-party data sources without licensing restrictions or fees. These connections, when paired with the data gathered from I/CAD, provide a much deeper level of analysis and can be integrated into reports and dashboards to help solve agency challenges. Agencies can add third-party records management data, data from Microsoft Excel spreadsheets, and many other sources.

MONITOR PERFORMANCE IN REAL-TIME

Agencies can set up interactive dashboards that provide several views of strategic information to help decision-makers monitor agency performance in near real-time and immediately react if needed. Microsoft SSAS models provide integration with Microsoft Power BI to quickly build on-demand, interactive dashboards and distribute them to the appropriate stakeholders.

LEVERAGE HISTORICAL DATA

Intergraph InSight Reporting can pull information from an agency's entire archive of historical information to provide the data points needed to identify trends and historical patterns that aid decision-making.

VISUALIZE & UNDERSTAND DATA

Intergraph InSight Reporting allows agencies to easily create dynamic, visual reports and dashboards that users of every skill level can understand and interpret. Agencies can deliver relevant insights in the most appropriate form for each stakeholder group through custom interactive reports and dashboards, mobile reports, and modern-looking paginated reports.

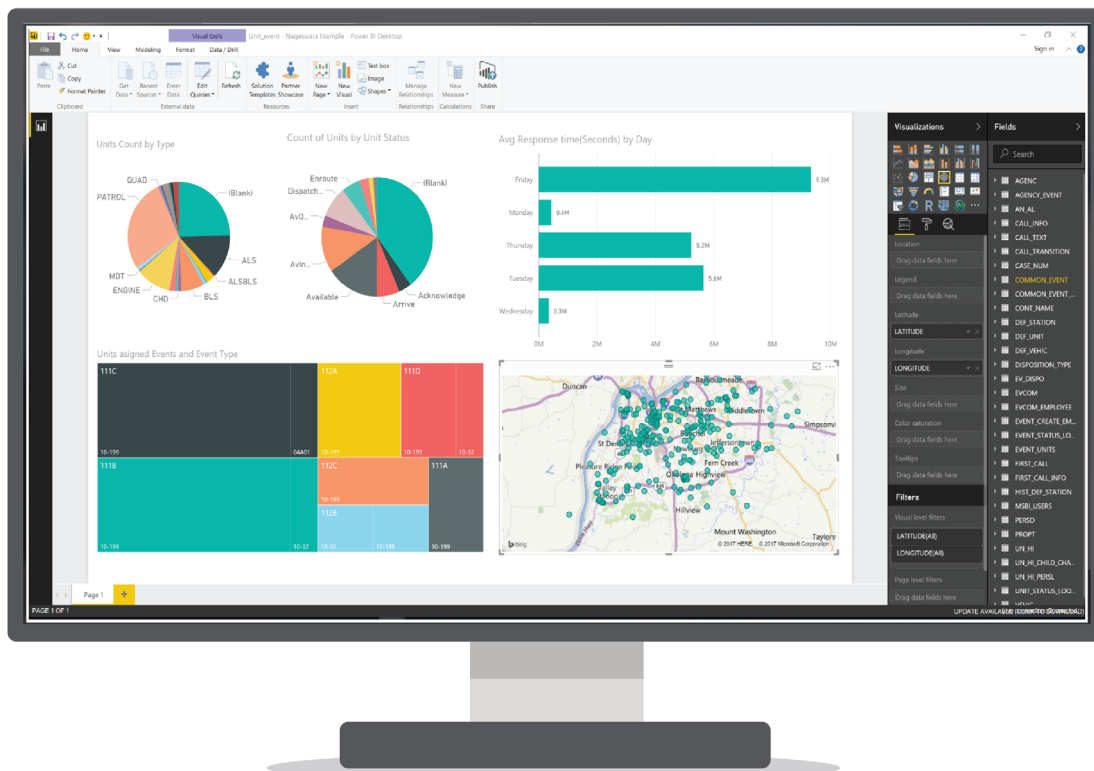

EASILY SHARE REPORTS WITH STAKEHOLDERS

With Intergraph InSight Reporting, agencies can easily distribute reports and dashboards to appropriate stakeholders. Users can leverage Microsoft SSRS to schedule and automatically e-mail

reports to stakeholders (daily, weekly, or monthly). They can also create on-demand reports, and share them with the appropriate stakeholders via e-mail. In Microsoft Power BI, users can publish reports and dashboards to the Power BI cloud service for sharing and collaboration.

VIEW REPORTS ON THE GO

With Intergraph InSight Reporting, users can create mobile reports that they can view in full, visual detail on any mobile device. This allows stakeholders to stay informed from anywhere.

Use Intergraph InSight Reporting models to build custom dashboards with Microsoft Power BI.

About Hexagon Safety & Infrastructure

Hexagon Safety & Infrastructure provides mission-critical and business-critical solutions to governments and service providers. A global leader, proven innovator, and trusted partner, our software and industry expertise help improve the lives of millions of people through safer communities, better public services, and more reliable infrastructure. Visit hexgonsafetyinfrastructure.com.

Hexagon Safety & Infrastructure is part of **Hexagon** (Nasdaq Stockholm: HEXAB; [hexagon.com](https://www.hexagon.com)), a leading global provider of information technologies that drive productivity and quality across geospatial and industrial enterprise applications.
