

MODULAR BUILDING SOLUTIONS

Affordable high quality and long-lasting portable structures

Traditional building projects demand excess time and budget dollars. Building projects often require long periods of construction causing disruption in the workplace. Portable modular buildings are a smart alternative to traditional building structures and offer significant bonus features.

Hexagon’s portable modular buildings are customizable, reconfigurable, sustainable, and affordable. Adhering to all applicable traditional building codes, our portable buildings use high quality materials ensuring a long-lasting and reliable structure. Easily built for countless uses, our modular buildings can serve as office space, conference rooms, cafeterias, bunk and living quarters, restrooms, and more. They are designed to meet your custom requirements with turnkey options available.

Major benefits to Hexagon modular portable buildings include:

- Accelerated path to occupancy
- Reduced material waste
- Less site disruption
- Easily reconfigured and relocated
- Stackable, allowing for more room with a smaller footprint
- Meets all traditional code requirements

Time & Cost Savings

Our portable modular buildings are affordable with low maintenance costs and significantly decrease traditional construction time. Easily moved by trailer, crane, or forklift, our modular buildings offer a customized solution that allow for future re-configuration with minimal effort.

Stackable units offer a smaller footprint to maximize available space and can even be constructed within existing office

buildings or warehouses. Noise isolation construction means quiet and productive working environments for your staff. Our portable office structures also include design options for secure environments, saving the hassle of transforming existing buildings to meet secure federal regulations.

Superior Construction

Unlike many competing modular building providers, Hexagon’s portable structures are long-lasting and reliable. Our buildings require no foundation and are built with all-steel galvanized construction.

These modular structures also feature steel powder coated walls, vinyl flooring with concrete fiberboard, and mineral wool noncombustible insulation. They are fitted with internal rain systems and are designed to withstand high wind environments. We use only the highest quality materials to ensure exceptional results and overall customer satisfaction.

Energy Efficiency

Our modular building solutions also capitalize on modern energy efficient methods to reduce lifecycle and maintenance costs. We insulate all roofs, walls, and floors and install LED lighting throughout the buildings.

We install tinted double pane windows that allow for a comfortable lighting environment while providing increased insulation and energy saving technology. Additionally, Hexagon offers high efficiency split system air conditioning ensuring even more energy and cost savings.

Summary

Hexagon portable building solutions provide affordable and customizable physical spaces that are reliable and sustainable, meeting many of your cost and energy efficiency goals.
